Experiment Number	1
Experiment Title	Build a Resume using HTML/CSS
Date of Experiment	06-01-25
Date of Submission	13-01-25

1. Objective:- To create a structured and visually appealing resume using HTML and CSS, showcasing personal information, skills, education, experience, and contact details.

Procedure:-

- **Plan the Layout:**

Decide the sections of the resume like personal details, skills, education, and experience.

- **Write HTML:**

- Create a basic structure using `<html>` and `<body>` tags.
- Add sections for name, contact info, education, and skills.

- **Style with CSS:**

- Link a CSS file or use `<style>` in the HTML.
- Add colors, fonts, and spacing to make it look neat.

- **Add Links and Images:**

- Insert a profile picture with ``.
- Add links to LinkedIn or email using `<a>`.

- **Test the Resume:**

- Open the file in a browser to check how it looks.
- Fix any errors if needed.

- **Save and Submit:**

- Save the final version in a folder and submit it on time.

2.

3. Code:-

Index.html

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <meta name="viewport" content="width=device-width, initial-scale=1.0" />
    <title>Resume - Aditya Tiwari</title>
    <link rel="stylesheet" href="styles.css" />
  </head>
  <body>
    <div class="resume">
      <header class="header">
        <h1>ADITYA TIWARI</h1>
        <p>
          
          <a
            href="https://www.linkedin.com/in/adityatiwari2855/"
            target="_blank"
            >adityatiwari2855</a>
          <br>

}
```

4. Results/Output:-

5.Remarks:- The resume was successfully created using HTML and CSS, following the planned layout and design.

- Key learnings include:
 1. Proper use of semantic HTML tags for better structure.
 2. Applying CSS for styling and creating a professional appearance.
 3. Testing and debugging for compatibility across different browsers.
